

Refrigerant Leak Detector

Detect and pinpoint even small leaks of refrigerant gases using **Model C-380 Refrigerant Leak Detector**. The **C-380** is effective in detecting existing refrigerants including HFC, HCFC, CFC, SF6, R134a, and R123. An increasing tick rate sounds as a leak is pinpointed and the red indication light flashes more rapidly. The flexible gooseneck probe is ideal for hard to reach areas. Use the **C-380** in domestic and commercial refrigeration systems, automotive, air conditioning, and quality control testing environments.
