

PATR210

PAT Test report certificates

- PAT test report certificates
- 110 V or 230 V tests
- Visual, bond, insulation and leakage
- Rated load and measured load sections
- Simple tick boxes for rapid form completion
- Provision for portable RCD test results
- Self carbon paper for duplication entry
- Card writing sheet included
- Shrink wrapped pad
- Certificate image on rear for pre-purchase verification

DESCRIPTION

Self-carbon paper certificate pad.

This certificate pad is an alternative to electronic certification, and is ideal for quick completion on-site utilising tick boxes in some sections. It is a perfect partner to the Megger range of PAT testers, providing a comprehensive test report.

Client, test company and engineer details can be recorded, also provisions are made for recording 110 V and 230 V appliances as well as the essential visual, continuity and insulation tests. Additional result sections include rated and measured load, class and leakage. A polarity indication is also provided for extension lead tests.

With the portable RCDs becoming more popular, the PATR210 allows for recording pass or fail for these devices.

As details like serial number, description, location and comments can be entered the book can also be used as an appliance register book.

Notes to assist completing the certificate are included.

For more detail on Megger test equipment and software for electronic certification including downloading instruments visit www.megger.com/uk

This pack contains 50 certificates and copies as shown below
