information@itm.com

Why choose the revolutionary Scotch-Brite™ Bristle Discs and Brushes?

Long life with consistent performance

Scotch-Brite Bristle Discs & Brushes last longer than most abrasives and provide the same finish and cut throughout their life. For productivity in automated procedures, there are fewer changeovers.

Conformability

Unlike most abrasives, Scotch-Brite Bristle products are flexible and conform to irregular surfaces. You can expect a consistent finish even on the most complex parts.

Safety

To help you meet increasingly tough safety standards, Scotch-Brite bristle discs contain no wire filaments. When replacing chemicals or compounds, they have the added benefit of not emitting harmful chemical vapors.

Industrial Cleaning, Finishing and Deburring

Builder's Hardware Manufacturer • Automotive Aftermarket
• Medical Instruments • Metal Fabrication

Choice of discs or brushes for a wide variety of applications

The 8-inch Scotch-Brite™ Radial Bristle Brush is highly suitable for heavy-duty industrial applications due to its large surface area, one-inch width, and high concentration of 3M™ Cubitron™ Abrasive Grain. TC brushes feature curved bristles for extra conformability, while TS brushes feature straight bristles which can be run in either direction and offer aggressive cleaning and deburring. The 6-inch TA brush aggressively cleans and deburrs, and the 3-inch disc works in tighter areas and can be used on most die grinders.

8" Radial Bristle Brush, grade 50, removing paint mounted on a straight shaft tool.

Ideal for hard to reach areas

The Scotch-Brite™ 2-inch, 3-inch and 6-inch Radial Bristle Discs create an incredibly uniform finish even around protrusions, detail grooves, patterns, and other hard-to-reach areas. The 6-inch radial bristle brush insures the quality finish you demand. It also saves you money because it works much faster and has a longer life than traditional abrasive products.

Radial Discs and Brushes

Cleaning, General Maintenance and Repair (MRO)

Any Maintenance Facility • Automotive Repair • Engine Rebuild

4.5" Bristle Disc, grade 50,
removing paint from aircraft wing.

High speed discs for most right angle tools

These 4.5-inch and 7-inch Scotch-Brite™ Bristle Discs remove paint, stains, adhesives, weld burns, rust, heavy oxides, and surface contaminants from large areas quickly and easily with light pressure from the operator. Maximum operating speed is suitable for most right angle tools.

Fast running discs with standard Roloc™ attachment system

These fast running 1-inch, 2-inch, and 3-inch discs with a standard Roloc™ attachment efficiently clean or strip many substances from metal surfaces without damaging the work piece. An operator quickly and easily achieves a quality, consistent finish with light pressure.

Aerospace Maintenance and Repair

Radial Bristle Discs and SR Cutters

Fast sealant removal without affecting underlying paint

These plastic abrasive particle-filled products remove 1/16-inch or less of sealants, silicones, RTVs, and adhesives from most surfaces. The unique construction removes the sealant but not the underlying paint or other coating. That means less time for rework.

Remove paint and corrosion with Scotch-Brite™ 360 & SPA

Radial Bristle Discs are much less likely to damage or gouge the work surface than traditional abrasives Scotch-Brite 360 and SPA are so easy to control, the operator can remove paint one layer at a time. Other benefits include a lower surface temperature than competitive products, and a minimized work area. The flexible bristles conform to the part allowing for a uniform finish.

2" SR Radial Bristle Disc cleaning final layer of seam sealant around aircraft fuel tank fasteners.

SR Cutter removing thick applications of seam sealant.

Quickly remove seam sealant

The 3M™ SR Cutter reduces the time involved in sealant removal by up to 50%. The SR Cutter works very quickly, and reduces the possibility of damaging the paint or metal on the aircraft. The SR Cutter also eliminates the need for toxic chemicals which are both harmful to the mechanic and messy.
