

COMBUSTION GAS ANALYZERS

A new degree of efficiency

Combustion gas analyzers

A new degree of efficiency

Our combustion gas analyzers are ideal for maintaining combustion equipment, covering the full range of operations in residential, commercial and industrial applications.

Sauermann offers a range of compact and intuitive analyzers to enhance your performance.

Sauermann's combustion gas analyzers feature the latest digital and metrology technologies, making measurements more reliable and cutting the amount of time heating engineers need to spend on-site. A user experience like no other!

Applications

- Boilers
- Burners
- Water heaters
- Gas and diesel engines
- Furnaces
- Industrial kilns
- Industrial heating systems
- Incinerators

Residential

Commercial

Industrial

Features

Add a digital edge to your combustion analysis

Auto pump cut-off for high CO levels (adjustable)

Predictive maintenance with estimated sensor life & calibration reminders

Draft & differential pressure measurements

Mobile phone app for real-time remote display & control

Calculations for Combustion Efficiency, Excess Air, & CO2%

Data management with automatic logging & report creation

Si-CA 030

All the essentials for combustion gas analysis

The Si-CA 030 offers everything heating engineers need to inspect and maintain residential and commercial boilers, with wireless connection to our smartphone app and automatic generation of servicing reports and certificates.

- Up to three gas sensors: O₂, CO and NO (for NO_x)

- Auto pump cut-off for high CO levels

- NO_x capable with NO sensor
- Quick and easy pump On/Off control
- CO safety monitoring in ambient air

LIGHTWEIGHT
350 g

Si-CA 130

Comprehensive, versatile analyzer with touch-screen display

The Si-CA 130 features a touch-screen display and comes with PC-based management software (in addition to the smartphone app) for more in-depth combustion gas analysis. The three field-replaceable cells and sensors offer expanded measurement capability.

- Up to three gas sensors O₂, CO, and NO or Low NO (for NO_x)

- Field replaceable precalibrated sensors

- Auto pump cut-off for high CO levels (user-adjustable)
- NO_x capable with NO sensor (optional)
- One Touch Pump On/Off with Purge
- PC software with wireless and USB connectivity
- Graphical data display
- Customizable gas analysis screen

ACTUAL
SIZE

SCREEN
DISPLAY

19.4 cm - 7.5"

Features Si-CA 030 / Si-CA 130

- Predictive maintenance with estimated sensor life & calibration reminders
- Draft & differential pressure measurements
- Calculated CO₂ % value
- CO safety monitoring in ambient air
- Combustion efficiency and excess air calculations
- Protective rubber casing
- Maintenance agreements and extended warranties available
- Emissions values adjusted for reference O₂

- CO measurement up to 8,000 ppm

- Color display

- Data management with automatic logging & report creation through app/PC software

- Lightweight, only 12 oz (350 g)

Si-CA 230

State-of-the-art, industrial emissions analyzer

With up to six gas sensors and expanded measurement capabilities, the Si-CA 230 is well suited for boilers, burners, engines, and other industrial combustion applications. And with support for more gases and a high CO tolerance threshold, its versatility makes it the ideal choice across commercial and industrial applications.

-  Up to Six Gas Sensors. Can include O₂, CO, NO, Low NO, NO_x, Low NO_x, SO₂, Low SO₂, H₂S, and CxHy
-  CO Dilution auto-range with measurements to 50,000 ppm
-  Total NOx & Low NOx Capable
-  Field Replaceable Pre-Calibrated Sensors

Mobile app

Sauermann Combustion

The Sauermann Combustion app lets you control your Si-CA Analyzer remotely, view measurement results in real time, and customise them before exporting in the format of your choice.

Features: Si-CA 230

- Ergonomic, light weight, & durable design
- Data management with automatic logging & report creation
- Predictive maintenance with estimated sensor life & calibration reminders
- One touch pump On/Off with purge
- PC software with wireless and USB connectivity
- Auto pump cut-off for high CO levels
- Graphical data display
- Customizable gas analysis screen
- Stack gas velocity with Pitot tube
- Draft and differential pressure measurements
- Emissions values adjusted for reference O₂
- CO safety monitoring in ambient air
- Protective rubber holster
- Maintenance contracts and extended warranties available

- Free apps for iOS & Android mobile devices
- PC software with USB & wireless connectivity
- Fast, easy wireless connection
- Remote live view of combustion analysis data as list or graph
- Remote control to change settings
- Data saving, including automatic logging
- Report creation in PDF, CSV (for Excel) and XML formats
- Databases for customers, operators, & equipment

HVAC essentials

The extra tools you need

Thermo-hygrometer
with integrated thermohygrmetry probe

Si-HH3

The palm-sized Saueremann Si-HH3 thermo-hygrometer easily measures relative humidity and temperature.

Digital Differential Pressure
Manometer

Si-PM3

The palm-sized Saueremann Si-PM3 digital differential pressure manometer easily measures pressure.

Infrared thermometer

Si-TI3

The palm-sized Saueremann Si-TI3 infrared thermometer is key to diagnose, inspect and check any temperature, with the advantage of using "no-contact" technology.

Dual Input Thermometer K
Thermocouple Temperature

Si-TT3

The palm-sized Saueremann Si-TT3 dual input thermometer easily measures K thermocouple temperature.

Vane Thermo-anemometer
with integrated vane probe

Si-VV3

This advanced portable manometer features two high-precision piezoresistive sensors, meaning it can be used to take standard and differential pressure measurements – all with a battery life of 180 hours.

Portable
Gas Leak Detector

Si-CD3

This gas leak detector is perfect for quickly and easily detecting even the slightest leaks of various combustible gases (methane, propane, isobutane, LPG and other hydrocarbons).

Services

Calibration / Technical Support / Maintenance

To complement our range of measuring instruments, a team of 40+ offers a wide range of services, such as calibration and adjustments, after-sales support, on-site services and training.

Calibration and
adjustments

Technical
Support

On-site services

Training

Our laboratories, spanning over 16,000 sq ft, allow us to offer you all kinds of metrological services related to:

- Temperature
- Humidity
- Air velocity
- Air flow
- Pressure
- Gases (O₂, CO, NO, SO₂, NO₂, C₂H₄, refrigerants)
- Weighing
- Radiometry
- Tachometry
- Light measurement
- Electrical current

In Person or Virtual

Training

Technical Training Classes

Safety, Combustion Analysis,
& Air Quality Testing

Residential / Commercial / Industrial

Class Topics Include

- What is combustion?
- 3 T's of combustion
- Excess air
- CO₂ (carbon dioxide)
- Direct O₂ vs. CO₂ (why measuring is important)
- CO (carbon monoxide)
- Draft
- Heat exchanger test
- How to use an analyzer
- Why perform combustion test and why use analyzers?
- Why do we need to measure?
- How contractors can make money (\$\$) using an analyzer
- Atmospheric vs. High Efficiency condensing boilers / furnaces
- Sauermann's series of analyzers and IAQ monitors
- Combustible gas leak detection: soap bubbles vs. actual detection

Class Counts

for 2 NATE CEU Hours!

The Gold Standard for HVACR
Technician Certification
