

35-485 Punchmaster™II Impact Punchdown Tool

Professional grade punchdown tool used for terminating voice and data conductors to related networking and telecommunications equipment.

- Impact style design-internal spring loaded mechanism delivers a additional force to seat and cut conductors with less input force
- Selectable HI or LO impact force setting
- Includes two full blade sets - 110 (Data) and 66 (Telco) – each has cut/no-cut ends
- Cushioned end cap and body grip helps to absorb impact forces and reduces operator fatigue
- Turn-Lock™ Style blade holding design keeps blade aligned and secure in the tool
- Blades can be used to seat and cut Cat 3/5e/6/6A conductors and multi-pair telephone wires
- 2nd blade stores in base of tool
- Replacement blades available
