DRILL TAPS WITH SMOOTHSTART™ TIP

INDIVIDUAL DRILL TAPS

IDEAL® combination Drill Taps combine the tasks of drilling, tapping and deburring into one, providing an economical way to save you valuable time on each project.

Constructed from High Speed Steel (HSS) for strength and durability, the bits have balanced, hardened tapping edges. A 1/4" hex shank makes them compatible not only with cordless drills but also impact drivers. With the incorporated SmoothStart™ Tip these drill taps start cutting faster and smoother, resulting in a clean cut, and minimizing thread damage to extend the life of the bit.

While traditional drill taps have a single or double flute design, IDEAL Drill Taps feature a 3-flute design to provide faster chip removal and minimize binding while drilling. The deburring cutting edge provides a clean hole and prevents over-drilling. Rated for drilling and tapping up to 10 gauge mild steel, aluminum, copper, brass and even plastic.

When it comes to quality, performance and durability, IDEAL is the professional's choice for drill tap needs.

KITS

DESCRIPTION	PART #
8-Piece Drill Tap Kit	36-600
4-Piece Drill Tap Kit	36-601

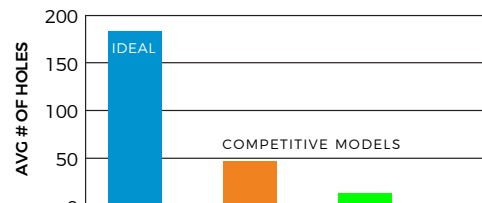

DO NOT ROCK

For optimal performance:

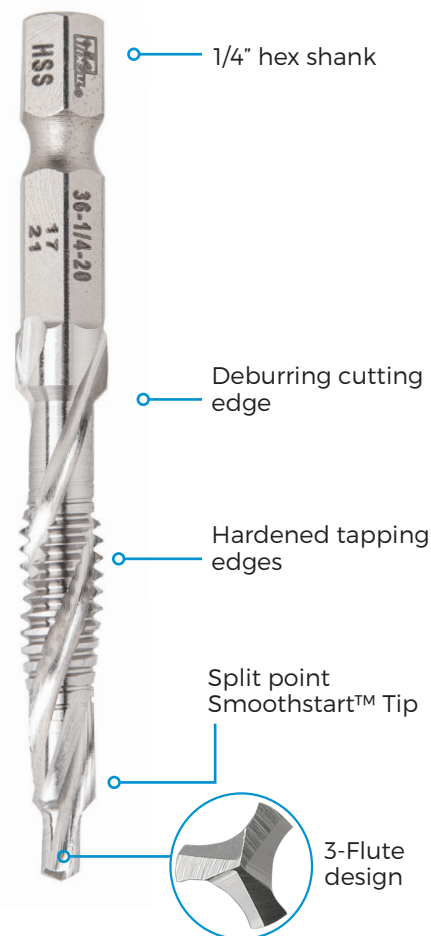

- Recommended RPM range is 300 to 1500 RPM
- Use in cordless power drills and impact drivers
- Use cutting oil to extend life of drill tap

Longest Lasting Drill Tap

AVERAGE HOLES DRILLED & TAPPED

Based on testing 1/4-20 drill tap in 10 AWG Mild Steel

WARNING Electrical and eye injury hazard. Contact with live voltage may cause injury or death. Do not use on or near live voltage. Wear eye protection.
