

New!

Aluminum End Wrenches

Work just got easier!

Years of experience and dedication working with Professionals, has resulted in the newest RIDGID® wrenches, the Aluminum End Wrench! Available in 10", 14", 18" and 24" models.

The Aluminum End Wrench is ideal for jobs in close quarters, such as where the pipe to be turned is close to a wall, or where several pipes are running close together. The aluminum handle makes the wrench **40% lighter** than other malleable iron wrenches, thus making one-handed operation virtually no work at all.

RIDGID's Aluminum End Wrenches follows in the tradition of being the **BEST** tools in the industry. It was only a matter of time before RIDGID set the standard, again.

Benefits

- **40% lighter** than malleable iron wrenches.
- Makes pipe turning easier in close quarters.
- Angled handle provides excellent leverage.

Catalog No.	Model No.	Description	Nom. Size		Pipe Capacity		Weight		Std Pack
			in.	mm	in.	mm	lb.	kg
