

RHTemp1000IS

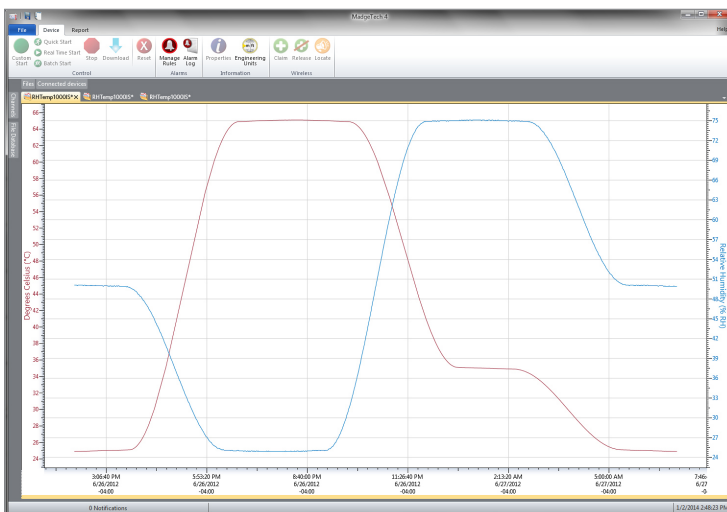

Intrinsically Safe Humidity and Temperature Data Logger

The RHTemp1000IS is an Intrinsically Safe humidity and temperature data logger. It carries hazardous location, intrinsically safe certification in accordance with the latest issue of FM3600, FM3610. This certification makes the device ideal for EtO Sterilization, environmental studies, and numerous other hostile environment applications.

The device can be started and stopped directly from your computer and its small, sleek size allows it to fit almost anywhere. The RHTemp1000IS makes data retrieval quick and easy. Simply insert the device into the IFC400 or the IFC406 USB docking station (sold separately) and our user-friendly software does the rest. The small size of the RHTemp1000IS, allows it to be placed in remote or hard to reach locations. The device now features a battery life indicator allowing users to easily identify low voltage and change batteries when required. This feature maximizes the use of your battery life and is a cost saving efficiency.

The MadgeTech Software is a powerful, analytic tool, available to download for free from our website madgetech.com. Data can be viewed in graphical or tabular formats and summary and statistics views are available for further analysis.
