Fast Response

- + 512 samples per cycle, rapid logging options available with 100ms and 50ms refresh rate available with WEB2 expansion module.

Time of Use

- + Users can assign up to four tariffs (sharp, peak, valley, & normal) to different time periods within a day. The Acuvim IIE meter will calculate and accumulate energy to different tariffs according to the meter's internal clock and TOU settings.

Display

- + Clear, large character LCD with white backlight
- + Wide environmental temperature endurance
- + View load percentage, 4 quadrant powers, & load nature

Optional I/O Module

- + Expand Acuvim II I/O functionality by connecting an optional I/O module. A maximum of three modules can be used per meter. Digital input, digital output, pulse output, relay output, analogue input, and analogue output I/O modules are available.

Alarms

- + Limits can be set for up to 16 indicated parameters with a specified time interval. Parameters that are over or under setting limit and persist longer than the specified time interval will be recorded and trigger the Alarm DO. Choose from 80 available parameters.

Power Quality Event Logging

- + The Acuvim IIW can record the triggering condition of power quality events, such as voltage sags or swells, with a timestamp. Up to 50,000 PQ events can be saved.

Waveform Capture

- + With a settable triggering condition, the Acuvim IIW can record 100 groups of voltage and current waveforms plus the waveform 10 cycles before and after the triggering point. Connect the AXM-WEB2 module to save waveform files in COMTRADE format.

Automatic Frequency Adaptation

- + Rated frequency automatically adjusts to local frequencies, such as 50Hz or 60Hz, making it ideal in countries with differing electrical frequencies.

Flexible Current Transformer Options

- + The Acuvim II is directly compatible with Rogowski coils plus a variety of other current transformer outputs including 5A, 1A, 80mA, 100mA, 200mA, and 333mV. All CTs are available from Accuenergy.

ACCESSORIES

DIN Rail Adapter

The AXM-DIN Rail Adapter is the easy way to mount the Acuvim II Series energy meter on either horizontal or vertical DIN rail. The adapter quickly secures to the meter and is compatible with all AXM communication modules as well as I/O options.

Protective Display Cover

The Protective Display Cover is designed for Acuvim II Series energy meters and other 96mm by 96mm display panel meters. Crucial in harsh environments, it increases the IP environmental rating of a meter's display to IP66 or NEMA 4X.

USB RS485 Converter

This plug-and-play USB to Serial RS485 Converter is designed to provide a convenient, reliable USB connection to the Acuvim II Series power meters and other serial devices.

		mA: 80ma/100mA/200mA (Input Field Selectable)	

Ordering Example: Acuvim IIR-D-5A-P1V3

- Note:
1. Accuenergy suggests using USB-RS485 converter for configuration, and 3 CTs per three phase circuits.
 2. All fields must be completed to create a part number.
 3. Add "-S" after power supply for anti-tampering seal option.
 4. Contact for 400Hz frequency option; Acuvim IIW doesn't support this type.
