

INSTALLATION INSTRUCTIONS

F-430

SPECIFICATIONS

- Meter Body:** Acrylic, clear
- Floats:** #316 Stainless Steel (optional Hastelloy)
- Float Stops:** Polysulfone
- Guidewire:** #316 Stainless Steel (optional Hastelloy)
- Adapters:** PVC
- O-Rings:** Viton and Aflas
- Scale:** Permanent Dual Scale Silkscreen
- Max. Pressure:** See Temperature vs. Pressure chart*
- Max. Temperature:** See Temperature vs. Pressure chart*

Your Blue-White® F-430 Series In-Line Flowmeter

Your Blue-White® flowmeter was designed to be easy to install.

Please read the Instruction Guideline on the next page before installing your flowmeter.

This flowmeter is an instrument, and special care should be taken when installing.

Unpacking the Flowmeter

- Check for damage while unpacking the flowmeter.
- Remove the plastic tube that has been inserted during packaging for shipping reasons.
- Be sure the meter is suitable for your application.
- The maximum temperature and pressure is shown on the following page.
- Although the meter may be suitable for other chemicals, Blue-White® meters are tested with water only. If you are unsure of the meters compatibility with your chemical, consult the factory.
- **Blue-White® guarantees the meter is suitable with water only.**

Installation Guideline

Please use the following steps to guide you through the installation.

Caution: Follow these tips to avoid failure

Danger: Wear eye protection when installing or removing flowmeter.

1. Flowmeter must be installed in an exact vertical plane to ensure accuracy.
 2. Use PTFE tape (or similar) for the flowmeters threaded adapters. Acrylic and other exotic plastics cannot tolerate PVC Glue and/or pipe dope. Even fumes can cause crazing. If you are installing your flowmeter to a glued pipe configuration, install flowmeter *after* all glued fittings are dried and lines are purged of all fumes. Never hold the meter with pliers or like tools. **DO NOT OVER-TIGHTEN!**
 3. Wall, floor and ceiling mounts are to be carefully aligned and sturdy. Wall, floor and ceiling supports are recommended as needed.
 4. Valves - **Avoid a system that will impose a sudden burst of flow to the meter.** Such a burst will cause the float to impact the float stop with destructive force. Solenoid valves, or other quick opening valves cannot be used unless meter is protected against sudden bursts of flow.
 5. Maximum working pressure not to exceed recommended psi at fluid temperature (see Temperature Vs. Pressure chart).
- 
- The diagram illustrates a vertical flowmeter installation against a brick wall. The flowmeter is a vertical pipe with a float valve at the bottom. Callout 1 points to the top of the flowmeter. Callout 2 points to the float valve assembly. Callout 3 points to the float valve assembly. Callout 4 points to the float valve assembly. Callout 5 points to the float valve assembly. The flowmeter is mounted on a wall, and the floor is indicated at the bottom.

Temperature vs. Pressure

Temperature

Pressure and Temperature

Pressure and temperature limits are inversely proportional. At the maximum suggested pressure the temperature should approach 70°F / 21.1°C; at the maximum suggested temperature the pressure should approach zero psi. We cannot guarantee our flowmeters will not be damaged either at or below the suggested limits simply because of many factors which influence meter integrity; stress resulting from meter misalignment, damage due to excessive vibration and/or deterioration caused by contact with certain chemicals as well as direct sunlight. These situations and others tend to reduce the strength of the materials from which the meters are manufactured.

Application Note

Flowmeters are tested and calibrated for water only.

Although meters may be suitable for other chemicals, Blue-White cannot guarantee their suitability. It is the responsibility of the user to determine the suitability of the flowmeter in their application.

F-430 Parts List. 1-1/2" and 2" male NPT

Item	Catalog No.	Description	Amount
1	76001-226	1-1/2" male NPT adapter, PVC F-430N	2
1	76001-216	2" male NPT adapter, PVC F-430N	2
2	90003-118	O-ring, Viton	2
3	91001-198	Float Stop/Wire Holder, Polysulfone	
4	90003-140	O-ring, Aflas	2
5	Float	4-40 GPM / 15-150 LPM, SS 6-60 GPM / 20-230 LPM, SS 8-80 GPM / 30-300 LPM, SS 20-100 GPM / 75-375 LPM, SS Hastelloy material is available in all flow ranges	1
6	76001-229	Guidewire, SS (standard)	1
6	76001-230	Guidewire, Hastelloy	1
7	Body	F-430 Acrylic Tube	1

Shading indicates item not sold separately

Maintenance

The "Exploded View" drawing illustrates assembly of the F-430N series meter. If your flowmeter needs to be cleaned refer to this drawing when reassembling the unit. The tapered tube may be cleaned with a soft bottle brush. Use a MILD soap and water solution for cleaning purposes. Note the floats "up" position.

Blue-white Industries Limited Warranty

FLOWMETERS are warranted to be free of defects in material and workmanship for up to 12 months from the date of factory shipment. Warranty coverage is limited to repair or replacement of the defective flowmeter only. Blue-White Industries does not assume responsibility for any other damage that may occur.

This warranty does not cover damage to the flowmeter that results from misuse or alterations, nor damage that occurs as a result of: meter misalignment, improper installation, over tightening, use of non-recommended chemicals, use of non-recommended adhesives or pipe dopes, excessive heat or pressure, or allowing the meter to support the weight of related piping. Flowmeters are tested and calibrated with water only. Although meters may be suitable for other chemicals, Blue-White cannot guarantee their suitability.

Flowmeters are repaired at the factory only. Call or write the factory to receive a Return Authorization Number, carefully pack the flowmeter to be returned, including a brief description of the problem. Note the RA number on the outside of the carton.

Prepay all shipping costs. The factory does not accept COD Shipments. Damage that occurs during shipping is the responsibility of the sender.
