

## GDS-3000 Series

**VPO**  
Visual Persistence Oscilloscope

The GDS-3000 Series digital storage oscilloscope is a full-featured and powerful tool that allows you to tackle complex measurement issues with ease.

The GDS-3000 Series, carrying a maximum bandwidth of 500MHz, is equipped with a real-time sampling rate up to 5GSa/s and an equivalent-time sampling rate of 100GSa/s. The large 8-inch SVGA TFT LCD screen, combined with the advanced digital signal processing technology – VPO, provides meticulous detail and clarity for the displayed waveforms. The GDS-3000 Series gives you confidence not to miss any part of the test signal in the product verification and debugging stages and allows you to speed up your task without hesitation.

### Rich Features

With widespread applications of embedded system using serial bus communications, resolving unexpected issues, such as propagation delay and bus contention, is often a challenge to design and testing engineers. The GDS-3000 Series provides (optional) design and testing engineers with powerful tools for the communication analysis and debugging of the most popular serial interface projects including I<sup>2</sup>C, SPI and UART.

To fulfill the increasing power measurement demands, as a green energy trend, GDS-3000 provides an embedded power-measurement software (optional), which includes measurements of Power Quality, Harmonics, Ripple and Inrush Current, meeting requirements of most power measurement standards.

### Hi-tech Platform

With 5GSa/s sampling and Visual Persistence Oscilloscope (VPO) technology, GDS-3000 displays waveforms truthfully and captures less-frequently-occurred signals, like glitches or runts, simultaneously without missing any spot of waveform information. A unique Split-screen feature allows each input channel to be operated independently with respective setting and waveform display. This gives users flexibility to use GDS-3000 Series as a multi-scope-in-one DSO.

To alleviate the burden of manual operation and to reduce human error, additional features such as auto range are used to automatically adjust the horizontal and vertical scale of a displayed signal so that waveforms are displayed with the best possible viewing ratio.

The I/O Interfaces give you a good range of choices and convenience. In the front panel, a USB host port is used for easy data access. And in the rear panel, another USB port can be used for remote control or for screen printout directly from PictBridge compatible printers. In addition, RS-232 and LAN interfaces provide the flexibility supporting broad range of applications. The SVGA video output port allows you to display the screen on an external projector or monitor for information sharing and discussion.

### Unique Signal Processing -VPO

The GDS-3000 VPO (Visual Persistence Oscilloscope) technology adopts a very unique signal-processing design. To significantly increase the data processing speed and the waveform capture rate, GDS-3000 uses FPGA platform to replace conventional serial microprocessor architecture. This unique technology allows the GDS-3000 Series to show waveforms in a fashion like that of an analog oscilloscope. The VPO three dimension waveform display, containing the information of amplitude, time and intensity, provides more useful signal contents for the analysis of rapid-changed events, such as video, jitter and infrequent signals.

### FEATURES

- 500/350/250/150MHz Bandwidth
- Dual Sampling Modes: 5GSa/s Real-Time Sampling Rate and 100GSa/s Equivalent Time Sampling Rate
- 25k Points Memory for Each Input Channel
- VPO (Visual Persistence Oscilloscope) Technology to Display Less-Frequently-Occurred Signals
- 8" 800 x 600 High Resolution TFT LCD Display
- Unique Split Screen System with Independent Setting for Each Input Channel
- Three Input Impedance Selections: 50Ω /75Ω /1MΩ
- Optional Power Measurement Software for Power Supply Measurement and Analysis
- Optional Serial BUS Triggering and Decoding Software Supporting I<sup>2</sup>C, SPI and UART
- Support GW APP Software-Easy Upgrade of Feature New Function

Front

Rear Panel

### APPLICATIONS

- Industrial and Educational R&D Labs
- Product Testing and Quality Assurance
- Power Supply and Serial BUS Design
- System Integration & Debugging
- Maintenance & Repair Service

**ORDERING INFORMATION**

<b>GDS-3502</b>	500MHz, 2-Channel, Visual Persistence DSO
<b>GDS-3504</b>	500MHz, 4-Channel, Visual Persistence DSO
<b>GDS-3352</b>	350MHz, 2-Channel, Visual Persistence DSO
<b>GDS-3354</b>	350MHz, 4-Channel, Visual Persistence DSO
<b>GDS-3252</b>	250MHz, 2-Channel, Visual Persistence DSO
<b>GDS-3254</b>	250MHz, 4-Channel, Visual Persistence DSO
<b>GDS-3152</b>	150MHz, 2-Channel, Visual Persistence DSO
<b>GDS-3154</b>	150MHz, 4-Channel, Visual Persistence DSO

**ACCESSORIES**

User manual x 1 ,Power cord x 1  
GTP-151R : 150MHz 10:1 passive probe for GDS-3152/3154 (one per channel)  
GTP-251R : 250MHz 10:1 passive probe for GDS-3252/3254 (one per channel)  
GTP-351R : 350MHz 10:1 passive probe for GDS-3352/3354 (one per channel)  
GTP-501R : 500MHz 10:1 passive probe for GDS-3502/3504 (one per channel)

**FREE DOWNLOAD**

PC Software FreeWave software Driver USB driver ; LabView driver

**OPTION**

<b>DS3-PWR</b>	Power analysis software: Power quality/Harmonic/Ripple/In-rush current measurements
<b>DS3-SBD</b>	Serial Bus analysis software: I <sup>2</sup> C/SPI/UART(only 4 channel models support SPI function)

**OPTIONAL ACCESSORIES**

<b>GUG-001</b>	GPIO to USB adapter	<b>GSC-008</b>	Soft Carrying Case
<b>GTP-033A</b>	35MHz 1:1 Passive probe	<b>GTL-110</b>	Test lead, BNC to BNC connector
<b>GTP-352R</b>	350MHz 20:1 Passive probe	<b>GTL-232</b>	RS-232C cable, 9-pin female to 9-pin female, Null modem for computer
<b>GDP-025</b>	25MHz High voltage differential probe	<b>GTL-246</b>	USB 2.0 cable, A-B type cable 4P, 1800mm
<b>GDP-050</b>	50MHz High voltage differential probe	<b>GRA-411</b>	Rack Adapter Panel
<b>GDP-100</b>	100MHz High voltage differential probe	<b>GDB-03</b>	Oscilloscope Education and Training Kit
<b>GCP-005</b>	1kHz/5A Current probe	<b>GKT-100</b>	Deskew fixture
<b>GCP-020</b>	10kHz/200A Current probe		
<b>GCP-100</b>	100kHz/100A Current probe		
<b>GCP-530</b>	50MHz/30A Current probe		
<b>GCP-1030</b>	100MHz/30A Current probe		
<b>GCP-206P</b>	Power supply for current probe (2 input channel)		
<b>GCP-425P</b>	Power supply for current probe (4 input channel)		
<b>GTL-248</b>	GPIO Cable, Double Shielded, 2000mm		
<b>GTL-251</b>	USB-GPIO Adapter, GPIO-USB-HS, USB 2.0, Hi-Speed USB compliance, 2000mm
