BNC Compression Seals & Crimpers

- Compression seal design uses one assembly procedure and one crimp tool for F, RCA, and BNC connectors
- The connector produces a cable retention that is far superior to any other connector design
- Once the connector is properly installed, it cannot be pulled off – ever!
- There will never be a service call as a result of this connector
- Superior electrical performance and high cable retention values
- Available in packs of 10

302-N2CSTP BNC Compression Seal Assembly Procedure

1) Trim cable as shown using strip tool P/N GST-1. Trim center conductor end at 45º angle.

2) Fold braid back. Note: For quad shield cable first cut foil and fold back second braid

3) Mark cable as shown

4) Push connector onto cable twisting connector clockwise and counter clockwise until connector end meets passes mark on cable.

5) Make sure BNC die head is in crimp tool P/N GET-CS.

6) Nest cable and connector into crimp tool. Note: For right angle and female connectors use no die head
