Engage Home Online Energy Monitor

efergy®

DESCRIPTION

The **engage** displays your energy consumption in real-time. It provides a rich interface with analytics for you to understand your energy usage. It can be used to track individual appliances, circuits or an entire home or business premise.

KEY FEATURES

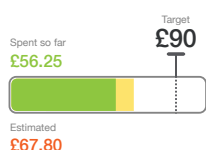

Real-time usage

Access your energy data in real time, anytime, from anywhere.

Budget

Set your monthly budget and see how close you are to meeting it.

Cost so far

View what you have spent so far today, this month and from a date of your choice.

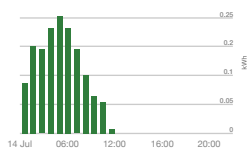

Energy demand

See when and how you consumed electricity and exactly how much power it demanded from the grid.

Download report

Download your daily, weekly, and monthly energy data report onto your PC/Mac.

Usage history

Check the amount of energy consumed per day, week, month or year.

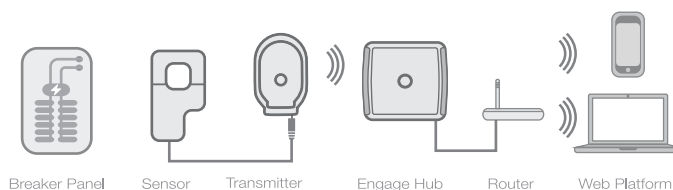

Add-on options

Add more sensors to monitor individual circuits of the home or...

HOW IT WORKS

A sensor is clipped onto the live feed cable of your breaker panel. A lead from the sensor is connected to the efergy transmitter. This transmitter wirelessly sends real-time data to the hub. The engage hub is connected to your internet router via an ethernet cable.

The web platform or app will then show you how much energy you are using in the same units that are on your bill.

TECHNICAL DETAILS

Model Name engage hub

Model Number: HH-2.0

Frequency: 433.5MHz

Dimensions 84x80x27mm

Certifications CE Canada RoHS FC Recycle No Lead

AVAILABLE FOR

EU UK USA AU

IN THE BOX

1 x engage hub | 1 x Transmitter | 1 x Sensor | 1 x Cable Ethernet | 1 x AC/DC Adaptor | 1 x Manual
