BRANSON

Bransonic® M and MH Ultrasonic Baths

General Description

Bransonic M and MH Series cleaners are known for offering a level of precision and reliability you have come to expect from Branson.

- M Series includes 60-minute mechanical timer and continuous operation.
- MH Series includes 60-minute mechanical timer and continuous operation with heating capability.

M and MH Series cleaners offer the following features:

- Sweep frequency eliminates standing waves and creates consistent cavitation throughout the tank.
- 40 kHz rugged industrial transducers.
- Controls are located above and behind the cleaning tank in an easily accessible control tower panel, and raised above the tank to avoid damage from cleaning solutions.

Consult with your Branson representative about the Bransonic accessories and solution best suited for your application needs.

- Convenient built-in pour drains are featured on .5- and .75-gallon models. Tank drains with valves are incorporated on models 1.5-gallon and larger.
- Plastic body, chemical-resistant.
- Constant activity/power tracking automatically
 maintains the ultrasonic power by adjusting for changes
 in liquid level and temperature caused by a light or
 heavy load. This helps ensure more uniform cleaning
 and consistent performance, even with multiple users
 or when bath conditions change.
