CPS Products is a world leader in the design and manufacture of tools and test equipment used in the Automotive and HVACR industries. Founded in 1975, CPS has grown from a single employee and a single product to over 200 employees and 1200 products. CPS maintains 5 fully staffed subsidiary locations strategically located around the world. These global locations provide the loyal CPS customer base with unsurpassed service of our expansive product line. The success of CPS can be attributed to a basic philosophy of providing our customers with the very best our industry has to offer. This includes the best service, the best products and most importantly the best overall quality.

Supported by state-of-the-art mechanical and electronic manufacturing facilities, CPS is able to actively develop, maintain and continually improve our respected product lines in our wholly owned facilities. This ability is quite unique in today's rapidly changing manufacturing community providing CPS with a decisive edge when developing new innovative products that solve our customer's service needs. When one of our products becomes a trusted tool that a service professional will recommend to their friends, then our job is complete.

After all, we make our living by manufacturing the tools you rely on to make yours!

ELECTRONIC REFRIGERANT LEAK DETECTION

THE ELIMINATOR™ LS3000B - Electronic Refrigerant Leak Detector

LS3000B

Fully automatic electronic refrigerant leak detector for all HFC, HCFC, CFC, SF6 gases & blends. Exclusive POWERSHIFT software automatically monitors, controls & adjusts all critical instrument settings to ensure maximum leak search results under any job environment. Two separate visual LED displays enable user to pinpoint the exact location of leak source & the approximate size of that leak.

A/C&R Application

Automotive Application

SENSOR TYPE:	Cold Cathode Diode: Patented design allows fast, accurate detection of refrigerant leaks maintaining maximum sensitivity throughout the life of the sensor. Highly resistant to background contaminants including heavy condensation, oils, leak solutions, brake oils, radiator coolants, washer fluids, etc.
SENSITIVITY:	Fully automatic selection better than 0.10oz/yr (3g/yr) leak rate of HFC.
LEAK INDICATION:	Audible Alarms: Two user-selectable audible alarm options (HIGH and LOW intensity)
TACHOMETER DISPLAY:	Visual tachometer-like bar graph display: Eight high intensity LEDs
GEARSHIFT VISUAL DISPLAY:	Arranged in a gearshift pattern, 7 LEDs indicate the current sensitivity range of the unit and subsequent leak size
FLEX PROBE:	14" / 35.6cm long, 0.25"/6.4mm diameter
OPERATING TEMPERATURE:	0 to 140°F / -18 to 60°C
POWER:	75 hours battery life using three size "C" alkaline batteries. Auto OFF after 10 minutes of inactivity.
LOW BATTERY INDICATOR:	Right most LED on Tachometer display illuminates to indicate low battery condition.
WEIGHT:	1lb 2oz / 500g
WARRANTY:	2 years excluding sensors and batteries

EXCLUSIVE POWERSHIFT™
Automatically controls all sensitivity related settings, eliminating guesswork and maximizing unit performance.

HIGHLY RESISTANT TO BACKGROUND CONTAMINANTS
Including heavy condensation, oils, leak solutions, brake fluid, radiator coolants, washer fluids, etc.

8 LED TACHOMETER DISPLAY
Enables user to pinpoint exact location of leak

EASY ONE BUTTON OPERATION
Depress once to turn unit ON.
Depress again to CLEAR the unit.
Double-click to change sensitivity.
Depress and hold to turn unit OFF.

STATE-OF-THE-ART COLD CATHODE DIODE (CCD) SENSOR TECHNOLOGY
Delivers quick response to leaks and maintains maximum sensitivity throughout the life of the sensor.

HIGH OUTPUT ALARM SPEAKER
Delivers clear crisp alarm tones

UNIQUE "GEARSHIFT" LED DISPLAY for LEAK SIZING
allows user to determine the approximate size of a leak.
Neutral - Unit is ready for operation
Leak Size: Small, Medium, Large

ELECTRONIC REFRIGERANT LEAK DETECTION

LEAK SEEKER® - LS780B / LS790B Electronic Refrigerant Leak Detectors

LS790B

Combines the most advanced microcomputer circuitry with field proven Ion-pump® sensor technology creating a highly sensitive, accurate electronic refrigerant leak detector. Over 100 computer generated tones and a high intensity bar graph display quickly alerts the user to varying halogen concentrations. Patented automatic calibration design eliminates the need for manual balance or tick rate adjustments while the user selectable 10 sensitivity ranges enables the **LS790B** to detect leaks of all refrigerants.

Specifications for the LS780B and LS790B

SENSOR TYPE:	Patented Ion-Pump® sensor with built-in selective filter housing
SENSITIVITY:	Better than 0.25oz/yr (7g/yr) leak rate of HFC.
AUDIBLE ALARMS:	Over 100 computer generated tones varying in intensity with leak size
VISUAL DISPLAY:	10 high intensity bar graph display (LS790B) / High intensity LED display (LS780B)
LOCK-OUT MODE:	Unique feature enables quick & easy locating of refrigerant leaks in highly contaminated search zones. In this mode, the unit will automatically & systematically store the recorded concentration levels of background refrigerant while initiating leak search, alarming only in the area of the highest recorded concentration level, the actual leak source. (LS790B only).
FLEX PROBE:	18" / 45.7cm long metal cable probe
OPERATING TEMP:	0 to 140F / -18 to 60C
POWER:	40 hours battery life using 4 "AA" alkaline batteries. Auto OFF after 15 minutes of inactivity.
LO BATT INDICATOR:	5th LED constantly illuminates dimly indicating low battery condition.
WEIGHT:	1lb 2oz / 500g
WARRANTY:	2 years (LS790B). 1 year (LS780B). Excludes sensors and batteries

LS780B

A rugged, three position slide switch is used to turn the instrument on & select either LO or HI sensitivity ranges. Visual indication of the leak size is provided by a high intensity LED varying in brightness with the concentration of the refrigerant detected.

Refrigerant Monitor

RM

Compact, highly reliable, yet economical refrigerant leak monitoring systems. Designed to monitor a single refrigerant in a single zone providing early warning of costly and environmentally damaging refrigerant leakage. Adjustable sensitivity settings between 100 to 1000PPM with an auxiliary 1/2 HP N.O. and N.C dry contact control function for operating an additional alarm or other safety device. Replacement sensors are interchangeable enabling the replacement of a failed sensor directly in the field without recalibration, minimizing "downtime."

GAS SEEKER® GS30 - Portable Combustible Gas Detector

The **GS30** is a low maintenance, easy-to-use portable combustible gas leak detector engineered to pinpoint leaks in residential, commercial and industrial appliances. Advanced semiconductor sensor and electronic control package enables detection of gases commonly found in service applications including; Carbon Monoxide, Natural Gas, Propane, Ammonia, Methane, Acetone, Hydrogen and Iso-Butane, with a virtually instantaneous alarm response period. Measuring just over 7" long and 0.72" in diameter its compact tubular shape enables testing in limited access areas and conveniently fits into a serviceman's pocket. Applications include the inspection of furnaces, valves, regulators, pipelines, meters and other devices associated with combustible gases.

GS30

Gases Detected

Carbon Monoxide, Natural Gas, Propane, Ammonia, Methane, Acetone, Hydrogen, Iso-Butane Acetone, Acetylene, Benzene, Butane, Ethanol, Ethylene Oxide, Gasoline, Hexane, Industrial Solvents, Paint Thinners, and Naptha.

WARNING: THE GS30 IS NOT INTRINSICALLY SAFE IN CLASS 1 (EXPLOSIVE) TYPE ATMOSPHERES AND IS NOT SUITABLE FOR THE DETERMINATION OF HUMAN SAFETY OR HABITABILITY CONDITIONS.

Detecting Range	0 - 100% LEL referenced to Methane.
Alarm Indication	Both visual and audible (>40db) alarm indicators
Low Level Alarm	Preset at 10% LEL.
High Level Alarm	Preset at 30% LEL
Operating Conditions	0°F to 104°F / -20°C to +40°C at less than 98% RH (non-condensing)
Power	Working voltage is 3VDC using two 1.5V AA batteries.
Battery Life/Indicator	5 hrs continuous use. Orange LED constantly illuminates when battery is low
Sampling	Natural diffusion
Dimensions	7.2 x 0.71in / 183 x 18mm
Weight	5.3oz / 150g (including battery)

UV REFRIGERANT LEAK DETECTION

UVPRO UV Flashlight & Enhancing Glasses

Actual Size

UVPRO

Don't forget the "UV" when selecting your next UV light.

Ultra Violet (UV) dye additives are specially formulated to fluoresce in the presence of UV light rays. Hence the common industry names for the two major components used with this technology, "UV" dye and "UV" lights. Referring to the light spectrum chart below you can see that true "UV" light is invisible to the human eye, with the closest visible light colors being purple and blue respectively. The overall intensity of UV light diminishes as you move from the invisible UV light range to purple, then to blue and so on down the chart. Take care not to confuse a lamp that emits high intensity visible blue light as superior to a lamp tuned more efficiently to emit true UV light.

UV LED TECHNOLOGY
UV LED's produce only true and efficient UV Light. The CPS® UVPRO provides UV-A (Long wave UV) 325-375nm. Instant on LED provides the fastest leak inspection of any light available.
Light spectrum wavelengths in nanometers

Why BLUE is NOT Necessarily Cool

A correctly tuned Ultra Violet (UV) lamp should predominantly emit invisible UV light waves with only a trace of visible "purple" or "blue" light. The small amount of visible light is required to direct the user's eyes to the leak search area, while the invisible UV light rays actually illuminate the leaking dye. Lamps that emit large amounts of visible blue light have been marketed heavily as being more powerful and more effective at fluorescing leaks, backed by the obvious high output of visible light. Knowing that UV dye additives requires invisible true UV light rays to effectively fluoresce dispels this claim altogether. In fact, special "blue blocking" glasses are required for use with these high output blue lamps in order to remove the nuisance blue light from the vision of the user during the leak search process. Otherwise, the high output of light will mask the actual leak or illuminating dye additive.

UVPRO - UV LED Light/Glasses Kit

UVPRO

The new and improved UVPRO light is the most compact and efficient UV light we have ever designed. The nine high intensity true UV LED's are specifically engineered to maximize the fluorescing capabilities of today's most commonly used dyes while greatly reducing the amount of "nuisance" background blue light emitted. Its rugged anodized aluminum body and o-ring sealed battery compartment allows it to handle harsh field conditions while small enough to conveniently fit in your pocket.

- 9 True UV emitting LED technology
- Rugged anodized aluminum body
- Works with all common dye additives
- Ultra Compact and lightweight
- Instant "ON" with no heat produced
- Operates on (3) AAA batteries (included)

CC800A

Programmable high capacity 220lb/100kg Compute-A-Charge® refrigerant charging/recovery scale, calibrated to strict NIST standards. Operating exclusively on two 9V alkaline batteries, the CC800A is the only fully automatic refrigerant scale that does not require line voltage and is R-410A compatible. Using the keypad controls, simply program the CC800A to transfer or recover a pre-set amount of refrigerant, hit "go" and walk away. The scale's advanced microcomputer circuitry will constantly monitor the progress of the job, shutting off the refrigerant flow when the pre-set amount is reached and audibly alert the user. A large, highly visible 1 1/2" x 2" / 37mm x 48mm high resolution LCD readout displays either Imperial or Metric measurements in .25oz / 10g increments. PRO-SET® Portable Vacuum/Charging Stations

“Ideal for both new installations and existing service work.”

PRO-SET® charging stations combine all the necessary tools required to perform a full system evacuation and subsequent charging in a single, compact, mobile unit. Each station includes a Vortech or BlackMax service manifold, a PRO-SET® vacuum pump, a Compute-A-Charge® refrigerant scale and premium charging hoses. The lightweight tubular steel frame incorporates rear wheels for easy transport to and from the jobsite with integrated storage areas for all components.

TEMPERATURE MEASUREMENT INSTRUMENTS

TEMP-SEEKER® Humidity/Temperature/Wet Bulb Diagnostic Analyzer

The TM350 is a professional grade thermo-psychrometer adaptable to accommodate all your temperature, humidity, dry/wet bulb and dew point measurements. The unit incorporates 4 discrete temperature ports all capable of min/max and memory functions including temperature differential between any 2 of the 4 available ports. Press the SCAN key and the display will alternate between all 4 ports in three second intervals providing continuous monitoring of multiple probe points during critical system diagnosis. A dedicated special purpose port accommodates an optional state of the art silicon humidity transducer probe for fast and accurate measurements during superheat calculations. Designed in a rugged polyethylene case the TM350 is engineered to provide laboratory accuracy in rough field conditions. A generous probe storage area is provided for housing all your job specific probes directly in the unit itself.

Features:

- Ideal for critical superheat calculations
- High accuracy silicon humidity transducer probe humidity probe port
- Large easy-to-read backlight display
- Min / Max and memory functions
- Temperature differential between any 2 ports
- Direct relative humidity and wet bulb measurements
- Auto-off after 15 minutes of non-use or continuous ON mode
- Integrated battery eliminator jack
- Rugged polyethylene carrying case w/ large probe storage area
- Large probe storage area
- Switchable °F/°C
- 1 year warranty

Instrument Specifications:

- Calibrated to NIST traceable standards
- Operating temperature range:
15°F to 120°F (-10°C to +50°C)
at 95% RH non condensing
- Accuracy: ±0.4°F (14°F to 158°F)
±0.2°C (10°C to 70°C)

- Resolution: ±0.1 degree from -40 to 99.9,
±1.0 degree from 100 to 300
- Auto power off after 10 minutes of non-use or selectable continuous ON mode
- 30 hrs battery life on (1) 9V alkaline
- Optional AC adaptor for 100 to 240 VAC mains, 2.1 mm center positive

TEMP-SEEKER® Non-Contact Infrared Thermometer

TMINI12

K-TYPE INPUT

LED LIGHT

4 Digit Backlit LCD

The **TMINI12** infrared thermometer provides instant temperature measurement over a wide range of applications. The unit offers simple one-handed operation, laser point sighting, a backlit display, °C/°F select ability and an automatic power off feature. Use the TMINI12 to quickly measure temperatures of registers, ductwork, furnaces, evaporators, condensers, compressors, relays, manifolds, radiators, exhaust systems, thermostats, bearings and more. Leather carrying case and 9V alkaline battery are included.

TEMPERATURE RANGE:	-76°F to 932°F or -60°C to 500°C
D:S (Distance to Spot Size):	12:1
EMISSIVITY:	Emmissivity pre-set at 0.95 - adjustable
ACCURACY:	±2°C (±4°F) or ±2% of reading
DISPLAY:	Digital Backlit LCD
RESOLUTION:	1°C/°F
BATTERIES/LIFE:	(2) AAA batteries and auto power off

The unit offers simple one-handed operation, laser point sighting, a backlit display, °C/°F select ability and an automatic power off feature.

Digital and Analog Pocket Thermometers

TM50

Digital pocket thermometer with stainless steel probe and pocket clip.
Range: -58° to 302°F / -50° to 150°C

A step above the standard pocket thermometer the **TM50** is packed full of features, including a user selectable temperature alarm, a countdown timer, Min/Max, °F/°C selectable and memory functions. The unit incorporates a highly accurate stainless steel 96mm puncture probe with a 4ft/122cm cord. Temperature range is -58° to 500°F / -50° to 260°C. The TM50 operates on a single AAA alkaline battery with 25 hours of battery life and a low battery indicator.

TMAP

Analog pocket thermometer with 1" dial and Stainless steel probe and pocket clip

K-TYPE TEMPERATURE PROBES

TMXSK90
Max Temp: 752°F (400°C)

The **TMXSK90** is the fastest and most accurate handheld K-type surface probe providing accurate readings in less than 5 seconds. The sensor is made from flat-spring ribbons of thermocouple material for contact on uneven surfaces. An angled head for measuring hard to reach surfaces and a 3 foot coiled lead for durability and long reach. The exposed junction provides for fast response and is compatible with any other instrument with a **K-Type** input.

VELOCITOR™ Air Velocity Meter

AM50

Precision vane type anemometer provides fast, accurate air velocity measurements for use in balancing HVAC systems or determining CFM calculations. A convenient TYPE K thermocouple is built-in to the remote vane providing quick measurement of grille/duct outflow temperatures from 32 to 122 F / 0 to 50 C. Included, is an easy-to-read laminated conversion chart that allows the user to quickly convert air velocity measurements into CFM calculations at a glance. Shipped with a rugged carrying case and is CE approved.

Sound Level Meter

SM150

Professional grade sound level indicator designed to measure noise levels from 35 to 130dB. The unit incorporates a large LCD, maximum hold function, Over and Under range indicator, peak and average response settings and A-C weighing for checking compliance with standard safety regulations. Applications include the monitoring of HVAC/R compressors, blowers, health and safety requirements, environmental quality issues, offices, factory machinery, airports, auditoriums and studio acoustics. Unit is CE approved and includes carrying case.

VACROMETER™ Digital Vacuum Gauge

VG200

AVT45

Advanced measurement instrument providing continual digital readout of evacuation process on large 5 digit LCD. Measurement units are user selectable to read in Microns, Torr, in/hg or mBar at the touch of a key. Advanced surface mount technology automatically compensates for ambient changes in the environment ensuring accuracy and consistency in performance. Advanced field-cleanable sensor is able to withstand 400 PSI of positive pressure. Unit operates 30 hours on 9V alkaline battery with low battery indicator and auto off feature. Includes carrying case, hanging hook, AVT45, 9V battery and is CE approved.

VG201 = VG200 + 1/8" NPT Thread Connection

SENSOR:

TYPE	Self - heated thermistor bridge with integral temperature compensation from 0 to 50 °C (32 to 122 °F).
OPERATING PRESSURE RANGE	Atmospheric pressure to 0 microns Maximum Working pressure: 400 PSIG
BURST PRESSURE	3000 PSIG
OPERATING RANGE	VG200- Atmospheric to 0 microns / VG100A- Atmospheric to 25 Microns
ACCURACY	+/- 10% of Reading.
OPERATING TEMPERATURE RANGE	Compensated (accuracy as stated): 0°C TO 50°C (32°F TO 122°F) Non-compensated (add +/- 0.5% error for every °C outside compensated range): 0 to 50°C (-22 to 158°F)
OPERATING & STORAGE HUMIDITY	0-95%, non-condensing.
STORAGE TEMPERATURE	- 40 to 185°F / - 40 to 85°C
POWER SOURCE	One 9 volt alkaline battery (ANSI 1604AC – IEC 6LR61)
BATTERY LIFE	20 hours of continuous use. Instrument shuts itself off after 5 minutes of operation.

Anti-Siphon Valve Kits

VPAS4 - 1/4" SAE Female Knurl Nut
VPAS8 - 3/8" SAE Female Knurl Nut
VPASU - 1/4" SAE, 3/8" SAE, 1/2"-20 UNF Female Knurl Nut

The CPS anti-siphon valve is an essential accessory to any vacuum pump application. The anti-siphon valve prevents the cross-contamination of vacuum pump oil and the compressor oil in the A/C or refrigeration system being serviced. Mixing of vacuum pump oil and compressor oil can cause premature failure in the A/C or refrigeration system. CPS makes three models that fit all CPS and other brands of vacuum pumps. *Add to any brand of vacuum pump to prevent the cross-contamination of vacuum pump oil and the compressor oil of the system being serviced.*

Connects directly to intake port of pump.
 All kits includes:
 1/4" SAE, 3/8" SAE & 1/2"-20 UNF Male fittings.

Premium Vacuum Pump Oils

PRO-SET® Premium Vacuum Pump Oil is an extremely high quality, severely hydrotreated vacuum pump oil. The oil is compatible for use in pumps made by most manufacturers. **PRO-SET®** Premium Vacuum Pump Oil should always be clean and free of contaminants such as moisture, acids, vapors, dirt etc. It is strongly recommended that the vacuum pump oil be changed after each use to improve service and the life of the pump.

CPS[®] PRO-SET[®] REFRIGERANT RECOVERY MACHINES

PRO-SET[®] Oil-Less Refrigerant Recovery Machine

CYCLONE 1HP

CR700

- Fastest overall ARI certified recovery rates in its class
- Powerful 1HP oil-less reciprocating recovery compressor
- Exceptional compressor, condensing & cooling systems allow fast recovery in high temperature environments
- Automatic Low Pressure shut-off feature turns unit off when recovery is completed
- Rugged high density double walled plastic housing with easy view top mounted controls
- R-410A ready with 550psi high pressure shut-off switch
- Ergonomic well balanced design for easy transport including shoulder strap - weighs 36 lbs/16.2kg
- Built-in suction filter located under suction port
- Worldwide patents pending

- Compact modular design with easy access 4 bolt latching system
- Complete compressor rebuilt in minutes
- Externally serviceable valves and gauges
- Integrated component moorings for quiet operation
- Fewer components equals more reliability

Oversized Piston

Larger discharge port

- Powerful 1HP oil-less reciprocating recovery compressor
- Oversized piston head & cylinder combined with a larger discharge port
- No suction valve eliminates failures caused by liquid slugs
- Heavy duty components with special long-lasting composite seals

CPS® PRO-SET® REFRIGERANT RECOVERY MACHINES

PRO-SET® Oil-Filled Refrigerant Recovery Machine

CR300

- ALL PRO-SET® MACHINES HAVE:**
- On the fly self-clearing valve (except CR300)
 - Integrated manifold block system
 - Built-in suction filter located under suction port
 - Indestructible high-density polyethylene case
 - Comfortable integrated carrying handle
 - Worldwide approvals CSA/CE/TUV-GS
 - UL certified to meet or exceed EPA regulations per ARI standard 740-95

CPS[®] PRO-SET[®] REFRIGERANT RECOVERY MACHINES

Refrigerant Recycling Module

*Operates with all brands of recovery machines

FEATURES:

- Easy access one bolt cover with 42 cubic inch solid core drier.
- High efficiency coalescent oil separator to remove oil and other contaminants from refrigerant.
- Ball Valves on the hoses for easy hook up and safe disconnection.
- Built in manifold with self clearing valve. Prepares the unit for the next refrigerant.
- Manifold utilizes CPS exclusive Triple Seal piston valves.
- Suction and discharge gauges for monitoring operation.
- 1/4" SAE Male flare oil drain port to remove recovered oil and contaminants.
- Light weight (15lbs) and ergonomically designed handle for portability.
- Heavy duty powder coated aluminum chassis surrounded by a tough high-density polyethylene case.
- 1/4" SAE Male flare fittings.

Gas Test Gauge / Fuel Oil Test Kit

Gas Pressure Test Assemblies

The **GT1** and **GT2** are designed to test the integrity of new installations for pressure leaks. Available with either a 3/4" or 1" FPT brass bell. Simply connect the test assembly, pressurize the system using the supplied access port and monitor the easy-to-read 3 1/2" / 80mm gauge for potential pressure drops that would indicate a leak.

- GT1**
GAS TEST GAUGE
- Large 3 1/8" gauge - easy to read
 - 0-30 PSIG (0-2 BAR) pressure scale
 - 1 PSIG increments
 - 3/4" FPT hex style brass bell
 - Access valve

- GT2**
GAS TEST GAUGE
- Large 3 1/8" gauge - easy to read
 - 0-100 PSIG (0-7 BAR) pressure scale
 - 2 PSIG increments
 - 3/4" FPT hex style brass bell
 - Access valve

Fuel Oil Test Kit

The **GT3** is a comprehensive test kit which includes the components necessary to test oil fuel pump performance while diagnosing related burner efficiency issues such as cleaner light-offs and coasting stops.

STANDARD CHARGING HOSES

STANDARD

- All-weather flexibility and strength
- Extra deep knurling on nuts for easy grip
- 750 psi working pressure; 3000 psi burst
- 1/4" SAE fittings with 45° bend on one end
- Available with MicroSeal™ or ball valve fittings
- Leak-proof eight-sided crimp
- Blow-off grooves channel refrigerant to prevent spray back

Adjustable Valve Core Depressor with a 1/16" larger I.D. for maximum refrigerant flow
 Extra deep knurling
 Extra long swivel barb assures Maximum holding power
 8 sided crimp

PREMIUM

- R-410A Compatible
- 800 psi working pressure; 4000 psi burst
- Environment friendly Nylon Permeation Barrier meets SAE J2196
- Compatible with CFC, HCFC and HFC refrigerants & blends
- Available with MicroSeal™ or ball valve fittings

Adjustable valve core depressor opens all out of tolerance Schraeder® valves.

- New micro valve technology enables use on systems with limited access to service ports
- Add to existing hose to eliminate refrigerant loss and comply with EPA regulations
- Deep easy grip knurling and non-restrictive porting for maximum refrigerant flow
- Up to 25% smaller O.D. than similar competitive models

PRO-SET® Tube Expander/Swaging Set

TLE6/TLE6M (metric)

- Create professional grade one seam pipe unions in the field.
- Multi-faceted interchangeable heads ensure equal linear expansion of tubing and uniformed wall thickness.
- Extended handle length provides added leverage for ease of operation.
- Re-round deformed tubing and fabricate couplings.
- Components are heat treated for durability.
- Ideal for copper, aluminum and soft steel tubing.
- Includes storage case for long-term protection.

Solenoid Magnet

The **TLMKC18** is designed to manually open solenoid valves by magnetically lifting the stem assembly and plunger. Simply slide the TLMKC18 over the valve's enclosing tube and the industrial grade magnets incorporated inside the rugged ABS plastic housing does the rest. It is an ideal tool for trouble shooting/servicing both direct connected or pilot operated 2-way solenoid, 3-way reclaim or 4-way reversing valves.

* 0.75"/18mm opening fits all common manufactured valves

TLMKC18

Compact Magnetizer/Demagnetizer

Use the **TLMAG1** to magnetize tools in order to keep small screws and nuts in position, especially helpful when working in confined spaces, or demagnetize tools when working on or near electronic circuit boards. Simply insert a screwdriver or nut driver into the (+) opening, slowly draw it out and it's magnetized. Leave the magnetizer on the tool for extra strength. To demagnetize, slowly draw the tool through the smallest area of the (-) opening. The TLMAG1 is an essential tool for the professional and do-it-yourselfer alike.

- Instantly Magnetize or Demagnetize Steel Tools & Parts
- Incorporates Two C5 Industrial Strength Magnets
- Impact Resistant ABS Molded Plastic
- No Batteries or Electricity Required
- Compact Design: 2" x 2" x 1"

TLMAG1

Composite Handle Adjustable Wrench

Super-strong tool that exceeds ANSI specifications providing years of service.

- Patented Light Weight Composite Handle Design
- Ergonomic, Comfortable Grip Reduces Fatigue
- Wide Jaw Opening With 45% More Torque
- Precision Machined for Smooth Operation
- Durable and Environment-Resistant
- One Year Warranty

Duct Knives

Used to fabricate fiberglass duct board. Stainless steel double edge resharpenable blade facilitates easy piercing for inside cuts. The double edge is also ideal for tapping into and trimming flex duct. Available with either ergonomic cushioned or a comfortable walnut wooden handle.

A double edge also ideal for tapping into and trimming flex duct.

Rechargeable Anodized Aluminum LED Work Light

Simply the best work light you will ever own, the **TLWL53A** is precision machined from aircraft grade aluminum and anodized for long life. Fifty three proprietary high output LEDs are incorporated in the work light segment with a 1W Luxeon LED integrated in the top. A powerful 2500mAh Ni-Mh rechargeable battery keeps the lights burning for hours; 7-8 hours for Luxeon spot, 4-5 hours for 53 white LEDs. The professional quality and intense output of the TLWL53A outperforms many competitive units incorporating 70 or more standard LEDs. Ideal for air conditioning contractors municipalities, law enforcement, fire fighters, automotive technicians, and wherever else a high performance, professional, durable work light is needed.

UVPRO UV Flashlight & Enhancing Glasses

Actual Size

UVPRO

Don't forget the "UV" when selecting your next UV light.

Ultra Violet (UV) dye additives are specially formulated to fluoresce in the presence of UV light rays. Hence the common industry names for the two major components used with this technology, "UV" dye and "UV" lights. Referring to the light spectrum chart below you can see that true "UV" light is invisible to the human eye, with the closest visible light colors being purple and blue respectively. The overall intensity of UV light diminishes as you move from the invisible UV light range to purple, then to blue and so on down the chart. Take care not to confuse a lamp that emits high intensity visible blue light as superior to a lamp tuned more efficiently to emit true UV light.

UV LED TECHNOLOGY
 UV LED's produce only true and efficient UV Light. The CPS[®] UVPRO provides UV-A (Long wave UV) 325-375nm. Instant on LED provides the fastest leak inspection of any light available.
 Light spectrum wavelengths in nanometers

Why BLUE is NOT Necessarily Cool

A correctly tuned Ultra Violet (UV) lamp should predominantly emit invisible UV light waves with only a trace of visible "purple" or "blue" light. The small amount of visible light is required to direct the user's eyes to the leak search area, while the invisible UV light rays actually illuminate the leaking dye. Lamps that emit large amounts of visible blue light have been marketed heavily as being more powerful and more effective at fluorescing leaks, backed by the obvious high output of visible light. Knowing that UV dye additives requires invisible true UV light rays to effectively fluoresce dispels this claim altogether. In fact, special "blue blocking" glasses are required for use with these high output blue lamps in order to remove the nuisance blue light from the vision of the user during the leak search process. Otherwise, the high output of light will mask the actual leak or illuminating dye additive.

UVPRO True UV Inspection Lamp

UVPRO

The new and improved UVPRO light is the most compact and efficient UV light we have ever designed. The nine high intensity true UV LED's are specifically engineered to maximize the fluorescing capabilities of today's most commonly used dyes while greatly reducing the amount of "nuisance" background blue light emitted. Its rugged anodized aluminum body and o-ring sealed battery compartment allows it to handle harsh field conditions while small enough to conveniently fit in your pocket.

- 9 True UV emitting LED technology
- Rugged anodized aluminum body
- Works with all common dye additives
- Ultra Compact and lightweight
- Instant "ON" with no heat produced
- Operates on (3) AAA batteries (included)

UV55A LED Refrigerant Leak Detection Kit

- Compact & Rugged anodized aluminum body
- Mess-free and easy to use Squeeze Gun™ injector
- 1 universal OEM approved dye cartridges; good for 5 vehicles
- Includes 90° low side snap coupler
- Operates 8 continuous hours on (3) AAA batteries (included)

UV Dichroic Refrigeration Leak Detection Kits

UV100

This design allows technician to use pre-measured, pre-filled dye cartridges and requires no refrigerant. Simply connect to low or high side and squeeze the trigger. Standard automotive a/c systems require only a 1/4oz/7.39ml. Larger cartridges are available for vans, trucks, buses, and refrigerated trailers.

Product application shown

UV300

This economical method of injection uses refrigerant to push dye into the system through a refillable anodized aluminum in-line injector. Simply fill the injector with the appropriate amount of universal Moonshine™ dye (1/4oz/ 7.39ml of dye treats 20oz/591ml lubricant).

TEMP-SEEKER® Humidity/Temperature/Wet Bulb Diagnostic Analyzer

The TM350 is a professional grade thermo-psychrometer adaptable to accommodate all your temperature, humidity, dry/wet bulb and dew point measurements. The unit incorporates 4 discrete temperature ports all capable of min/max and memory functions including temperature differential between any 2 of the 4 available ports. Press the SCAN key and the display will alternate between all 4 ports in three second intervals providing continuous monitoring of multiple probe points during critical system diagnosis. A dedicated special purpose port accommodates an optional state of the art silicon humidity transducer probe for fast and accurate measurements during superheat calculations. Designed in a rugged polyethylene case the TM350 is engineered to provide laboratory accuracy in rough field conditions. A generous probe storage area is provided for housing all your job specific probes directly in the unit itself.

TM350A includes (1) TMX2C, (1) TMX2GA, (1) TMX2FP

Nitrogen Pressure Leak Test Kit

NITROKIT

NITROKIT automotive Air Conditioning Nitrogen Pressure Leak Test Kit. This kit is needed to pre-check automotive A/C systems for leaks due to loose mechanical connections, leaks in hoses, evaporators and condensers, before re-introducing refrigerant back into the A/C system. This will prevent unnecessary leakage of refrigerant into the atmosphere.

The **NITROKIT** consists of the following items:

- NITRO test manifold with 0-200 PSIG gauge
- 6' Red Service Hose with 1/4 SAE Female
- R 134a High Side Snap Coupler
- 25' Coiled Air Hose Assembly with 1/4 MPT X 1/4 Coupler
- Instructional Manual

NITROKITG: includes the NITROKIT with a nitrogen regulator.

WARNING: Item must be used with nitrogen regulator. "NOT INCLUDED"

Portable R-134a Automotive Charging Station

CS12DMV4TP6Q

These portable, compact charging stations are ideal for small and large repair shops alike providing all the necessary tools to properly charge an A/C system on one lightweight tubular cart with rear wheels. Included with this station is a **PRO-SET®** manifold, a **PRO-SET®** vacuum pump, a **Compute-A-Charge®** refrigerant scale, premium charging hoses and manual R-134a couplers. The unit is designed to allow a full system vacuum and charging without reconfiguring the hoses for a contamination free charging.

- Unsurpassed Charging Accuracy of $\pm 0.015\%$ of reading
- Hanging ports and hooks for hose storage
- Rear wheels on Frame for Ease of Mobility
- Perfect for Busy A/C shops or as Alternative to Large Charging Equipment
- All Components Store Easily on Cart

"Ideal for both new installations and existing service work."

Pro-Set® Refrigerant Recovery / Recycling System

AR2788S

Fully Compliant with the new EPA required SAE J2788 and OEM Hybrid Required SAE J2788H Standard

- No assembly required! Simply remove the packaging material and add refrigerant.
- Multi language selectable in English, Spanish, French, German and Chinese
- The AR2788S emulates the appearance of a professional grade mechanics tool box with all steel construction, black powder coat finish and chrome trim
- Two integrated drawers provide convenient storage of A/C service tools and replacement filters
- Mobility around the shop floor is a breeze with heavy duty front casters and large 10" pneumatic tires in the rear
- Patent pending flow control technology enables faster and more accurate recovery, recycling and recharging

Pro-Set® Refrigerant Recovery / Recycling System

AR2700

*Tank shown not included

THIS EQUIPMENT HAS BEEN CERTIFIED BY UNDERWRITERS LABORATORIES INC. TO MEET EPA'S MINIMUM REQUIREMENTS FOR RECOVERY EQUIPMENT INTENDED FOR USE WITH ALL APPLIANCES CONTAINING REFRIGERANT 12, 22, 500, 502 AND 134A. UL CONTROL NUMBER 2HA5.

- Automatic programmable charging
- Lo side or Hi side or Hi & Lo side charging
- Non-restrictive heavy duty ball valve control system
- On board HI and LO gauges and valves for manifold function
- 16 cubic inch filter drier with moisture indicator
- .7 micron oil separator filter to collect and measure oil removed from the mobile A/C system
- 1" Heavy duty tubular steel frame with powder coated steel cabinetry
- Large 10" pneumatic wheels with 4.5" swivel casters for easy maneuverability
- R134a couplers and refill adaptors
- Can be dedicated to one of several refrigerants. See specification list for approved refrigerants
- Built in condenser for high ambient temperature operation
- Built in evaporator to protect the compressor against flood-back
- AR2700M series includes a pump down valve for multiple refrigerant use
- Optional 50 lb. or 90 lb. on board recovery tank

* The AR2700, AR2700J, AR2700E does not contain a pump down valve and is meant for single refrigerant operation. The AR2700M, AR2700MJ, AR2700ME contains a pump down valve for multiple refrigerant usage. Mixing of refrigerants will cause the user economic loss.

A/C Solvent Flushing Unit

Flushing an A/C system removes any particles and oil from the components reducing the possibility of system problems later on. Powered completely by shop air, the AFM100 can be changed from forward to reverse flush simply by turning a valve. All the contaminants and oil remaining after a catastrophic A/C failure are completely blown away by the high velocity motion of solvent. Fast and easy to use the AFM100 can be a great moneymaker for your business. The AFM100 Flush Machine is an essential tool for your shop.

- Air purge
- Forward or reverse flush without changing hoses
- Clear filter bowl with cleanable screen for visual inspection of what is being removed from A/C system
- Restores performance of A/C system by removing carbon build up from heat transfer condensers and evaporators
- Eliminates compressor or desiccant failure and residue from overheated lubricants
- Simple 2 step operation with only one hook up
- Capacity 2 quarts for cars to 2.5 gallons for buses
- Easy to connect quick couplers fit evaporators, condensers and hose connections
- 8' clear braided hoses
- Low maintenance

Warranty

CPS® guarantees that all products are free of manufacturing and material defects for one year from the date of purchase. If a product should fail during the guarantee period due to defective material or workmanship, it will be repaired or replaced (at our option) at no charge. This guarantee does not apply to products that have been altered, misused or are in need of field service maintenance. All repaired products will carry an independent 90 day warranty. LS3000B and LS790B carry a 2 year warranty.
