

ORPTestr® 10 and ORPTestr 10 BNC

Waterproof, dustproof tester for convenient testing of oxidation-reduction (REDOX) potential

Double-junction electrode design – For significantly longer electrode life, especially in applications with harsh chemicals (ORPTestr 10 only)

Wide mV range – From –999 to +1000 mV for an array of common applications

Offset of ±150 mV – Keypad adjustment to calibration solution or to an established work standard

Microprocessor-based functions – For fast, stable readings

Replaceable electrode module – Reuse the same tester body over and over

Waterproof, dustproof housing – IP67-rated housing protects your tester even in harsh field or plant conditions. And it floats, so you won't lose your tester by dropping it into a tank or pond!

Hold function – Freezes reading so that you can record it

Self-diagnostic error messages – Make troubleshooting easier

Auto shutoff – Extends the life of the batteries

IP67-rated waterproof, dustproof housing floats!

Electrode sensors are easily replaceable without affecting waterproof rating.

Double-junction electrode allows for long electrode life, even in harsh applications.
